

CLARA GRIMMELBEIN

esf3xw@virginia.edu | (571) 403-4533 | DC Area

EDUCATION

University of Virginia (UVA), Charlottesville, Virginia **Aug. 2022–May 2026**

- *Bachelors of Computer Science & Italian, Minor in Business*
- *Pursuing Distinguished Major (highly selective thesis capstone aimed for graduate study)*

WORK EXPERIENCE

Cloud Computing Intern, Pricewaterhouse Coopers (PWC) **June 2025–Present**

- *Leading Cloud-Based Configuration and Data Migration for a Top-25 U.S. Financial Holding Company* (~\$193 billion in assets, ~11 million customers) .

AI Physics Research Assistant, UVA Graduate Physics Department **Oct. 2024–Present**

- *Develop and Optimize Neural Networks, Least-Squares Fitting:* Using Python to extract Compton Form Factors from Deep Virtual Compton Scattering data, improving analysis precision.

ML Intern, UVA Engineering **June 2024–Aug. 2024**

- *Developed and Trained Large-Scale Deep Learning models:* including LSTM networks, for hydrological time series prediction and rainfall-runoff modeling using Python, TensorFlow, and Keras.

ML Research Assistant, Biocomplexity Institute of Computing **Apr. 2023–May 2024**

- *Optimized Performance of CNN models:* Enhanced ResNet, VGG, and DenseNet performance in image classification tasks using advanced tuning techniques.
- *Developed High-Performance Pipelines:* Devised and implemented pipelines to effectively clean and standardize 600GB of data, reducing storage by 83%.

Discovery Fellow, D.E. Shaw **May 2024**

- *1/49 Highly Competitive Cohort* selected from sophomore students across the country for a weeklong fellowship at D.E. Shaw Headquarters, NYC.

RELEVANT PROJECT EXPERIENCE

“NLP-Driven Italian Financial Market Intelligence Web Application”

- React for the frontend and Django for the backend to analyze Italian financial news and reports.
- NLP techniques to extract insights and trends from Italian texts, providing a unique perspective on market conditions.

“Clara’s Camera Roll”

- Website built using JavaScript to highlight personal travel hobby.
- UI/UX modelled after Pinterest’s, with an added twist of creative journalism blogs.

“Honors Senior Thesis: Social Media Consumption Optimization Using Attention-Aware GNNs”

- Exploring the integration of Graph Neural Networks (GNNs) with social media usage patterns to address cognitive overload and attention span challenges in human-computer interaction.

LEADERSHIP & EXTRACURRICULAR EXPERIENCE

Women in Computing Sciences (WiCS), University of Virginia **Oct. 2022–Present**

Hackathon Logistics Head

- Created and ran Hackathon Schedule for over 350+ participants
- Created Website, Discord, and Devpost to ensure effective communication between teams

Teaching Assistant, University of Virginia **Aug. 2023–Present**

- TA for 3 Classes: Advanced Computer Architecture, Introduction to Computer Science, and Calculus I

SKILLS

Languages: Python, Java, JavaScript, Assembly, C, R, HTML, CSS, Pandas, Cuda, React, Django, Italian (C1 Level)

Developer Tools/Frameworks: TensorFlow, Docker, NVIDIA Toolkit, Keras, Git, 3D Hyperbolic Geometrical Printing, Colab, and MSOffice
